

Summary

Fredrik has more than 10 years of experience in project management and automation, especially for the water and wastewater and real estate industry. In roles such as line manager projects, project manager, automation engineer, business developer, salesman and trainer, he has built up a solid knowledge and experience. Fredrik is curious and driven by an effort to simplify, improve and do things in a smarter way that creates a clear customer benefit, with technology and environment in focus. He has an easy time getting to grips with the problem in order to solve it effectively.
